Preface

Primary level constructs the foundation of education. A set of well-defined targets and properly planned primary education provide strengths to the entire education system. Keeping this in mind, the primary level has been given supreme importance in the Education Policy, 2010. Increasing the span and inclusiveness of primary education, in line with practices in developed countries, has been emphasised. Special attention has been given to ensure that no child's access to education is hindered by social and economic status, religion, ethnicity and or gender identity.

The National Curriculum and Textbook Board (NCTB) has implemented an integrated curriculum to update primary education. While this curriculum trails the pedagogy and the curriculum of developed countries, it also adopts traditional teaching-learning values of Bangladesh at the same time. This has enabled the education to be more life-oriented and productive. In accordance with the global context, the mental health of the children has also been specially considered in this curriculum.

Textbook is the most important component of curriculum implementation. NCTB has always borne it in mind while designing textbooks for all levels and classes including primary level. Curriculum goals and objectives have been prioritised in the writing and editing of each book. A keen eye has been kept on the diverse curiosity and capacity of the child's mind. Special importance has been given in designing the curriculum and developing textbooks to make teaching-learning interactive and enjoyable. It is hoped that each book will help in the balanced psycho-physical development of children through educational activities. It will support in acquiring the required skills, adaptability, patriotism and moral values at the same time.

There has been a growing need of English language proficiency in the rapidly changing, technology-driven world of the 21st century. With a view to addressing the need, the new revised textbook aims at enabling the learners to perform their day-to-day activities in any English-speaking context. As such, the textbook has been designed to facilitate their effective communication through four basic language skills, proper pronunciation, and integration of both local and global cultures, inclusiveness and skills like critical thinking, problem solving and creativity.

Special thanks to the specialists and teachers who worked intensively in writing, editing and revising the textbook. Thanks to those also who have made the textbook attractive to children through its design and illustration. This textbook has been revised to address the need in the changed context of 2024. Despite paying full attention, some errors may still exist. Any constructive advice and guidance from the audience will be considered with due importance.

At the end, I wish every success of the learners for whom the book has been produced.
